

**Solving One-Step Equations Practice- Day 2**

**1)**  $7x = 20 + 8$

**2)**  $w - 4 = 200$

**3)**  $48 = m + 30$

**4)**  $\frac{k}{2} = 9 + 1$

**5)**  $8x - 2x = 18 + 12$

**6)**  $12 + 8 = 9b + b$

**7)**  $7 + p + 8 = 5(9)$

**8)**  $3^4 = 9m \cdot 9$

**9)**  $11x = 20 + 2$

**10)**  $w - 8 = 15$

**11)**  $41 = m + 30$

**12)**  $\frac{m}{8} = 3(3)$

**13)**  $9(x + 5) - 15(3) = 27$

**14)**  $2c + 7c + 15 - 8c + 2(2) = 112$

**15)**  $\frac{r}{4} = 12 - 5$
