

Name the coefficients, number of terms, variables, and constants.

Expression	Coefficients	Number of Terms	Variables	Constants
$3x + 7$				
$4m + (-3n) + n$				
$6kp + 9k + kp - 14$				
$-8y + 6ab + 7 - 3ba$				
$c + 2c + c - 5c + 1$				

Write a word phrase for the following expressions:

- 1)  $x + 19$
- 2)  $m - 25$
- 3)  $15v$
- 4)  $5(j \div 4)$

Create an expression for the following sentence:

- 5) Five more than three times  $p$
- 6) The product of  $g$  and 7
- 7) A packet of Skittles  $s$ , divided among 5 friends
